MacOS:

Step 1: Edit Apache Virtual Hosts File

/Applications/XAMPP/xamppfiles/etc/extra/httpd-vhosts.conf

```
<VirtualHost *:80>
    ServerAdmin webmaster@quoteshare.local
    DocumentRoot "/Applications/XAMPP/xamppfiles/htdocs/quoteshare"
    ServerName quoteshare.local
    <Directory "/Applications/XAMPP/xamppfiles/htdocs/quoteshare">
        Options Indexes FollowSymLinks
        AllowOverride All
        Require all granted
    </Directory>
</VirtualHost>
```

Step 2: Enable Virtual Hosts in Apache

/Applications/XAMPP/xamppfiles/etc/httpd.conf
```
#Include etc/extra/httpd-vhosts.conf
```
Uncomment it!!!

Step 3: Edit hosts File to Map Domain

/etc/hosts

```
127.0.0.1   quoteshare.local
```

Windows:

Step 1: Edit Apache Virtual Hosts File

```
C:\xampp\apache\conf\extra\httpd-vhosts.conf

<VirtualHost *:80>
    ServerAdmin webmaster@quoteshare.local
    DocumentRoot "C:/xampp/htdocs/quoteshare"
    ServerName quoteshare.local
    <Directory "C:/xampp/htdocs/quoteshare">
        Options Indexes FollowSymLinks
        AllowOverride All
        Require all granted
    </Directory>
</VirtualHost>
```

Step 2: Enable Virtual Hosts in Apache

```
C:\xampp\apache\conf\httpd.conf
#Include conf/extra/httpd-vhosts.conf
```
- **Uncomment it!!!**
